

10TH ANNIVERSARY

15-20 | SEPT SALZBURG

PANGEO
AUSTRIA 2012

Session 18: State of the art in geosciences 3D modelling-systems and applications

Convenors: Robert MARSCHALLINGER, Fritz ZOBL (Salzburg)

Description: Geoscience data are intrinsically volume-related and a choice of software exists for the handling of static and dynamic, process-related solid models. This session welcomes innovative approaches to multi-dimensional analysis, modeling, simulation and visualization in the geosciences.
