

10TH ANNIVERSARY

15-20 | SEPT SALZBURG

PANGEO
AUSTRIA 2012

Session 4: Geodynamic setting and structural styles of Precambrian and Phanerozoic orogens

Convenors: Franz NEUBAUER, Guoqing HAN (Salzburg)

Description: Precambrian and Phanerozoic orogens expose a wide range of structural styles and contrasting geodynamic evolutionary histories and their variation is still poorly understood. The session intends to present case histories revealing principal controls on the variation of architecture of island arc, hot and cold active continental margin and continent-continent collisional orogens.
